Instructions to Authors

Physics Letters B is devoted to the rapid publication of important new scientific results in the fields of Nuclear Physics and High Energy Physics.

Submission

Contributions for Physics Letters B should be sent to the following Editors:

Experimental Nuclear Physics (Heavy Ion Physics, Low Energy Nuclear Physics):
R.H. Siemssen (KVI, University of Groningen, Zernikelaan 25, NL-9747 AA Groningen, The Netherlands),
Bitnet: Siemssen @ HGRRUG51

Experimental Nuclear Physics (Heavy Ion Physics, Intermediate Energy Nuclear Physics):
J.P. Schiffer (Argonne National Laboratory, 9700 South Cass Avenue, Argonne, IL 60439, USA),
Bitnet: Schiffer @ ANLPHY

Theoretical Nuclear Physics:
G.F. Bertsch (National Superconducting Cyclotron Laboratory, Michigan State University, East Lansing, MI 48824-1321, USA),
Bitnet: Bertsch @ MSUNSCL
or
C. Mahaux (Institut de Physique B5, University of Liège, B-4000 Liège, Belgium),
Bitnet: Mahaux @ BLIULG11

Experimental High Energy Physics:
L. Montanet (CERN, CH-1211 Geneva 23, Switzerland),
Bitnet: Montanet @ CERNVM
or
K. Winter (CERN, CH-1211 Geneva 23, Switzerland),
Bitnet: Winter @ CERNVM

Theoretical High Energy Physics from Ireland, United Kingdom, Benelux, Scandinavian countries, German Federal Republic, Poland, Czechoslovakia and the USSR:
P.V. Landshoff (TH CERN, CH-1211 Geneva, Switzerland (from 1 September 1991 – 31 August 1992)),
Bitnet: PVL @ UKACRL

Theoretical High Energy Physics from the remaining European countries:
R. Gatto (CERN, Theory Division, CH-1211 Geneva 23, Switzerland),
Bitnet: Gatto @ CERNVM

Theoretical High Energy Physics from countries outside Europe:
M. Dine (Physics Department, University of California at Santa Cruz, Santa Cruz, CA 95064, USA),
Bitnet: DINE @ SLACVM
or
H. Georgi (Department of Physics, Harvard University, Cambridge, MA 02138, USA).
Bitnet: Georgi @ HUHEPL

For further instructions see next page.

The original typescript and two copies, accompanied by a covering letter, should be submitted. The manuscript should be written in English.

Submitted papers will be refereed and, if necessary, authors may be invited to revise their manuscript. Proofs will *not* be sent, therefore authors should check their papers carefully before submission. If a submitted paper relies heavily on unpublished material, it would be helpful to have a copy of that material for the use of the referee.

By submitting a paper for publication in Physics Letters B the authors imply that the material has not been published previously nor has been submitted for publication elsewhere.

Preparation of manuscripts

The following requirements as regards presentation of the manuscript should be met:

(1) **Manuscript:** The original typescript should be typed on one side of the paper,with double spacing and a wide margin. Instead of the original typescript, a copy of high quality (not a carbon copy) is also acceptable. The title page should contain title, author(s), address(es) and abstract. The main text should start on a new page. All pages should be numbered.

(2) **Length:** The total length of the paper should not exceed four journal pages, equivalent to seven typewritten pages with double spacing, including the list of authors, abstract, references, figure captions and three figures. In the case that more figures are required, the text should be shortened accordingly.

(3) **Title:** The title should be brief and such that it conveys to the informed reader the particular nature of the contents of the paper.

(4) **Abstract:** An abstract of less than 60 words is required. It should contain the keywords of the paper as well as the essence of the results achieved.

(5) **Address:** The name(s) of the author(s) and the name and address of the institute where the research work was done should be indicated on the manuscript. The name of the author to whom correspondence is to be addressed should be underlined.

(6) **Figures:** Each figure must be referred to in the text, be numbered and have a caption. The captions should be collected on a separate sheet. The appropriate place of each figure should be indicated in the margin. Axes of figures must be labelled properly. The drawings for the figures must be submitted on separate sheets, drawn in black India ink and carefully lettered (with the use of stencils). The lettering as well as the essential details should have proportionate dimensions so as not to become illegible or unclear after the usual reduction by the printers (ideal lettering size after reduction of the drawing to one-column width is 1.8 mm). The drawings should preferably be of the same size as the typescript and designed for a reduction factor in print of two to three. The figures should be identified by the name of the first author, the journal name and the figure number. Instead of original drawings, sharp and contrasty glossy prints of about typescript size or high quality laserprints are also acceptable. If requested, original drawings will be returned to the author(s) upon publication of the paper.

(7) **Colour illustrations:** Illustrations in colour will be accepted in cases when the use of colours is essential for the presentation. The Publisher will bear part of the costs, which arise from the need of printing four colours and the need to prepare colour-separated printing films by means of scanning the original colour figures. These costs will be Dfl. 1000 for the first page containing colour and Dfl. 500 for each additional page with colour, independent of the number of colour figures on each page. These prices are exclusive of Value Added Tax (VAT).

The author receives 200 reprints with colour illustrations free of charge. More reprints can be ordered at the usual rates and there will be no additional charge for reprints containing colour illustrations.

Colour illustrations should be submitted in the form of original colour photographs, transparencies or 35 mm slides. Polaroid colour prints should be avoided. When supplying colour photographs and transparencies they should be close to the final size expected for publication.

It should be noted that, in some cases, printing requirements will prevent figures from being located in the most preferred position in the text.

(8) **Formulae:** Displayed formulae should be numbered and typed or clearly and unambiguously written by hand. Symbols requiring bold-face type, like vectors, etc., should be identified properly in the margin of the manuscript. Long equations should be avoided as much as possible by introduction of suitable abbreviations of component expressions. Special attention should be paid to symbols that can easily be misread, such as i (lower case), I (cap.), l (el), 1 (one), ′ (prime), o (lower case), O (cap.), 0 (zero), ° (degree), u, v (vee), ν (Greek nu), V (cap.), x, ×, X, z, Z, p, P, ρ (Greek rho), etc.

(9) **Tables:** Tables should be typed on separate sheets and each table should have a number and a title. The appropriate places for the insertion of the tables should be indicated in the margin.

(10) **Footnotes:** The footnotes may be typed at the end of the page on which they are alluded to, or at the end of the paper, or on a separate sheet. *Please do not mix footnotes and references.*

(11) **References:** In the text, reference to other parts of the paper should be made by section (or equation) number, not by page number. References to other papers should be consecutively numbered in the text and should be listed by number on a separate sheet at the end of the paper. The references should be as complete as possible and be presented as follows:

For a book:

B. de Wit and J. Smith, Field theory in particle physics, Vol. 1 (North-Holland, Amsterdam, 1986).

For a paper in a journal:

UA1 Collab., G. Arnison et al., Phys. Lett. B 177 (1986) 244.

For a paper in a contributed volume:

R. Jackiw, in: Progress in quantum field theory, eds. H. Ezawa and S. Kamefuchi (North-Holland, Amsterdam, 1986) p. 83.

For an unpublished paper:

J.F. Gunion and H.E. Haber, UCD Report 86-12 (1986), unpublished.

For a preprint:

A. Lahanas and D.V. Nanopoulos, CERN preprint CERN-TH 4400/86 (1986).

For a conference report:

M.B. Green, Superstrings and the unification of forces and particles, in: Proc. fourth Marcel Grossmann Meeting on General relativity (Rome, June 1985), Vol. 1, ed. R. Ruffini (North-Holland, Amsterdam, 1986) p. 203.

Copyright transfer

Upon acceptance of an article, the author(s) will be asked to transfer copyright of the article to the Publisher. This transfer will ensure the widest possible dissemination of information.

Publication speed

The Editors and Publisher cooperate closely to ensure minimal publication delays. All proofreading will be done by the Publisher and proofs are *not* sent to the author(s). In order to keep delays to a minimum it is of utter importance for the author(s) closely to observe the guidelines given in the "Preparation of Manuscripts" above before submission of the manuscript.

Publication scheme

Physics Letters B will be published weekly.

Page charge and reprints

There is no page charge. Reprints may be ordered from the Publisher: an order form is sent to contributors upon acceptance of their communications.

Corrections and modifications

Once the article has been accepted for publication, minor corrections should be sent directly to the Publisher (see below). They may be collected in a letter, or sent in the form of a corrected manuscript, *which should clearly show all deviations from the original text*. The Publisher may decide to resubmit corrections to the Editor.
Extensive modifications should be submitted to the Editor, in the form of a corrected manuscript in duplicate, *one copy clearly showing all deviations from the original text*. Simultaneously, the Publisher should be notified to hold publication of the paper.

Authors may be charged with the costs of necessary retypesetting.

All correspondence with the Editors or Publisher should contain full reference to the paper concerned, i.e., the names of all the contributors, the full title, as well as the reference number. Contributors are reminded that, once their contribution has been accepted for publication, all further correspondence (except extensive modifications, see above) should be sent directly to the Publisher and not to the Editors (Drs. E.J. van der Wolk, Editorial Department, Elsevier Science Publishers B.V., P.O. Box 103, 1000 AC Amsterdam, The Netherlands; telephone number (020)–5862634; telefax number (020)–5862319; electronic mail: NHPDESKED@ELSEVIER.NL, X400 address: C=NL; A=400NET; P=SURF; O=ELSEVIER; S=NHPDESKED (the receipt of a bitnet message will be acknowledged; in the absence of this acknowledgement, the mailer should assume that his message was never received at the Editorial Department. Individuals using networks other than BITNET should suggest an address for sending the acknowledgement of receipt)).

A prompt reply may be expected whenever appropriate. If no reaction is received within three weeks, authors are kindly requested to seek contact again.

PHYSICS REPORTS

A Review Section of Physics Letters

Over the years **PHYSICS REPORTS** has built up an international reputation as one of the leading review journals for diverse branches of physics.
PHYSICS REPORTS keeps the active physicist up to date on developments in relatively narrow fields, by publishing timely reviews which are more than just literature surveys but normally less than a full monograph. Each issue is devoted to one specific subject. These reviews are specialist in nature but contain enough material to make the main points intelligible to a non-specialist. The reader will not only be able to distinguish important developments and trends but will also find a sufficient number of references to the original literature.
Every month approximately 6 issues are published and to date more than 1000 articles have appeared.

All issues of **PHYSICS REPORTS** are available to **individuals only** at a substantial discount, under our BULK ORDER SCHEME. In this way research workers and graduate students will be in a position to afford their own copy of a particular report. Depending on the issue size, the special prices range from US $7.00 to US $15.00.

In order to take advantage of this special offer, you and your colleagues can send your combined orders directly to the publisher, *providing the total order amounts to at least US $100.00 and is accompanied by payment (cheque, payment instruction).* By meeting this requirement, individual postage, handling and invoicing charges can be avoided. If you would like to receive the full listing of all **PHYSICS REPORTS** published to date - the **Physics Reports Bulk Order Scheme** - please send in the form (or a photocopy of it) below.

Please note that you may combine your order with issues of Surface Science Reports and Materials Science Reports, which are both available under a similar scheme.

REQUEST FORM

Please complete and return to:
Mr. H. de Brouwer
NORTH-HOLLAND (Elsevier Science Publishers)
P.O. Box 103, 1000 AC Amsterdam, The Netherlands

☐ Please send me the Physics Reports Bulk Order Scheme, listing all available Physics Reports.
☐ Please send me a copy of the Surface Science Reports Bulk Order Scheme.
☐ Please send me a copy of the Materials Science Reports Bulk Order Scheme.
